

# FuelGuard

## Preventative Maintenance Program

### FACILITY MANAGEMENT

FuelGuard's Facility Management program is designed to ensure your stored fuel remains contaminate free and within ASTM specifications at all times.

| PRODUCT | PROBLEMS                       | ADDITIVE                 | WHAT IT DOES   |
|---------|--------------------------------|--------------------------|--|
| Diesel  | Microbial Growth               | Biocide Bellicide        | Protect Fuel Quality in Storage and Prevent Corrosion (Through elimination of active microbial activity) |
| Diesel  | Excess Water from Storage Tank | DFS Plus                 | Can Help Prevent Microbial Growth by Eliminating Free Water  |
| Diesel  | Tank Sludge                    | Tank Treatment SDF       | Disperses Microbial Biomass; Protects Tank Surfaces from Corrosion                                       |
| Diesel  | Emulsified Water in Fuel       | Demulsifer EB or Dee-Zol | Resolves Fuel-Water Emulsions to Allow Emulsified Water to Separate from Fuel                            |
| Diesel  | Corrosion in Storage Tank      | Tank Treatment SDF       | Protects Tank Surfaces from Corrosion  |

FuelGuard has partnered with Bell Performance Chemicals to offer industry-leading chemical solutions for our valued customers, including lab analysis, resulting in lower maintenance costs, lower liability and higher fuel quality. All Bell chemicals are EPA registered products.
